Abstract (en)

[origin: EP2842452A1] A cleaning device for an electrical appliance includes a cleaning bowl for receiving a part, needing to be cleaned, of the electrical appliance, a container for storing a cleaning liquid to be fed into the cleaning bowl, a cleaning liquid feeder configured to feed the cleaning liquid in the container into the cleaning bowl, a discharge passage for returning the cleaning liquid in the cleaning bowl into the container, and a support frame for supporting the cleaning bowl. The cleaning bowl has elastic modulus smaller than the support frame.
