Abstract (en)
[origin: EP2842462A1] A freestanding clothes rail kit (19; 300; 70) is disclosed which includes a first rail attachment portion (320; 81), a second rail attachment portion (330; 82), a first side member (340; 83) and a second side member (350; 84). When the clothes rail kit (19; 300; 70) is assembled and in use, the first rail attachment portion (320; 81) is attached to first side member (340; 83), the second rail attachment portion (330; 82) is attached to the second side member (350; 84), and the first rail attachment portion (320; 81) and the second rail attachment portion (330; 82) extend towards one another for attachment with one another. The first side member (340; 83) is biased towards the second side member (350; 84) so that the first rail attachment portion (320; 81) and the second rail portion (330; 82) are held in compression between the first and second side members (340; 83, 350; 84).
