Abstract (en)
[origin: EP2843328A2] The present invention relates to a back-loadable refrigeration cabinet (10) comprising a frame (11; 11 A, 11 B, 14) and cooling devices, which frame (11) is open to the front of the cabinet (10) and forms a product space (13) and has a back wall structure (11 B) comprising sliding doors (15) , which cooling devices are located in an equipment space (12) provided in the frame (11) and connected to at least one air duct (18) for providing cooled air to the product space (13). The frame (11) has a bottom part (11 A) with a front edge having a height (H) to the bottom (17) of the product space (13) from floor level 100 - 380 mm.
