Abstract (en)

[origin: EP2843774A1] The present invention relates to an electromagnetic shielding assembly (200) for electromagnetically shielding an electrical power transmitting arrangement (307, 500), comprising at least one shielding sleeve (210; 210') having at least one shield contact tongue (211), integrally formed with and connected to the shielding sleeve (210;210') on one end (213), and being provided with a free end (215), whereby the free end (215) comprises at least one connection portion (217) which is mechanically and electrically coupled to the shielding sleeve (210;210').
