Abstract (en)

[origin: EP2843959A1] A multimedia device and a method for controlling the same are disclosed. The multimedia device connected with an external device according to one embodiment of the present invention comprises an external device interface module connecting the external device with the multimedia device; a network interface module performing communication with the external device through a network; a display module displaying video data and first GUI data, which are received from the external device through the external device interface module; a user interface module receiving a control signal output from a remote controller; and a controller, wherein the controller processes the control signal output from the remote controller in the multimedia device if second GUI data on the multimedia device are displayed on the display module together with at least one of the video data and the first GUI data, and transmits the control signal output from the remote controller to the external device through the network interface module if the second GUI data on the multimedia device are not displayed on the display module.
