Abstract (en)

[origin: WO2013164143A2] The invention relates to a slicing device comprising a cutting blade that cuts slices from the front end of a food product. A means conveys the food product in the direction of the cutting blade and/or presses the food product against a support, and a gripper grips the rear end of the product. The invention further relates to a method for slicing a food product that rests on a support, is conveyed in the direction of a cutting blade, and enters in contact with a gripper at the rear end of the product.
