Abstract (en)
[origin: WO2013163988A1] The invention relates to a press for producing pressed articles (28) from powder material (27) which is pressed by punches (12, 15) which act counter to one another in a die (17), having a receptacle (9) for a lower punch (15) which is stationary and is supported by a support frame (2), having a receptacle (11) for an upper punch (12), which receptacle (11) can be moved by crank-driven pull rods (7), and having a drive device for the die (17). According to the invention, the drive device for the die comprises at least one electromechanical drive (19-21).
