Abstract (en)
[origin: WO2013164489A1] The invention relates to a tool mounting (100) with a connecting element (120) and a frame for holding tools for treating large surfaces, in particular boat hulls. According to the invention, the proximal end of the connecting element (120) can be positioned on the distal end (201) of a support system (200) using a connecting means (121) and can pivot about a first pivoting axis (S1), the distal end of the connecting element (120) has a self-supporting connection to the frame (110) and can pivot about a second pivoting axis (S2), and the first pivoting axis (S1) is oriented substantially perpendicularly to the second pivoting axis (S2).
