Abstract (en)
[origin: WO2013164050A1] The invention relates to a packaging for cigarettes (26) comprising a box part (11) and a cover (12) which is pivotably arranged on the box part (11), the box part (11) forming a receiving chamber for a cigarette block (25), and a collar (13) being arranged in the box part (11), which collar protrudes from the top-open box part (11) and is enclosed by the cover when the cover (12) is in closed position, the collar (13) having means for reducing the size of the receiving chamber, in particular of the cross-section, of the box part (11). The invention is characterised in that the collar (13) has elements (31, 32) formed by material deformation, in particular embossment, in order to reduce the size of the receiving chamber, in particular of the cross-section, of the box part (11) according to the dimensions of the cigarette block (25).
