Abstract (en)

[origin: WO2013165284A1] The present disclosure provides a method 20 performed in a control node 2 of a communication system 1 for scheduling delivery of data, wherein the control node 2 is arranged to communicate with a base station node 3 of the communication system 1. The base station node 3 is arranged to communicate wirelessly with a user device 6; 10. The method 20 comprises receiving 21, from the user device 6; 10, a request for delivery/retrieval of data to/from the user device 6; 10, the request comprising a time limit by which to provide the requested data, and scheduling 22, based on downloading and/or uploading conditions, the requested data for provision to the user device 6;10 or to a client node 9 associated with the user device 6; 10 before the expiry of the received time limit.
