Abstract (en)

[origin: WO2013164251A1] The invention relates to a device (10), in particular for operating one or more light sources, which device has a memory (11), in which operation data and/or operation information of the device (10) are stored in human-readable or machine-readable form. The invention further relates to an interface (12) for communicating with a reading device (25), which is designed to read the operation data and/or operation information.
