Abstract (en)

[origin: WO2013167237A1] The invention relates to a method for loosening, conditioning and flavouring tobacco in a rotating drum (11), wherein the tobacco is introduced into the drum through a loading opening (12). A portion of tobacco that is introduced remains in the drum (11) until all loosening, conditioning and flavouring steps have been performed and a subsequent portion of tobacco is only introduced into the drum (11) after the drum (11) has been emptied.
