Abstract (en)

[origin: WO2013167133A1] Industrial sieve (1) for separation of materials in powdered, granular or other particulate form, where said industrial sieve (1) comprises a sieve (10) arranged in a frame (11) which frame (11) comprises a side member (11', 11") on each opposing side of the sieve (10), where said side members (11', 11") are connected to a reciprocating reference mass (30) by resilient suspension means (13, 14), and where linear reciprocating means (20) for reciprocating said sieve (10) relative to the reference mass (30) is/are arranged such that the reciprocating force stemming from the reciprocating means (20) is transferred linearly and equally to each side member (11', 11").
