Abstract (en)

[origin: WO2013143664A1] The present invention relates to a module (1) for supplying a strip to be stamped, intended for a stamp printing machine, said module comprising means (10) for supporting at least one spool (2) of a strip (3) to be stamped, as well as means for driving each strip to be stamped. The invention is characterized in that the support means (10) and the driving means are installed in a work space (30) provided at the upper portion of the module (1), and in that the lower portion of the module (1) comprises a free space (40) which can be accessed laterally from the exterior and which is connected with the work space (30) at the top thereof.
