Abstract (en)

[origin: WO2013167331A2] The invention relates to an arrangement (1) for fastening a design component (2) to at least one covering and/or frame element (3, 4). According to the invention, at least one retaining element (7), which is integrally moulded or formed on the back of the design component (2), is arranged in a form-fitting and/or force-closed manner in a cut-out (11) formed correspondingly in a first covering and/or frame element (3). The invention further relates to a method for producing a fastening arrangement (1).
