Abstract (en)
[origin: US2013299372A1] A packaging system for a powered oral care device is disclosed. The packaging system includes a first module having at least one powered oral care accessory contained within an interior space of the first module; a second module having a powered oral care device contained within an interior space of the second module, the powered oral care device including a handle section and a cleaning section coupled to the handle section; and a container encompassing the first module and the second module, wherein the container includes two or more windows through which the powered oral care device is visible to a consumer. The packaging system has a height of not more than about 255 mm and a tip angle of about 9 degrees or higher.
