Abstract (en)
[origin: WO2013167121A1] The invention relates to a device (1) for the scour protection of offshore constructions (2). In order to achieve a durable, cost-effective and at the same time effective protection which can be dismantled in a simple manner, it is proposed that the device (1) has a flexible mat (3) or a plurality of interconnected flexible mats (3) and also weight elements (4) fastened on the outer edge region of the device (1), and carrier elements (7) are provided for reinforcement, on one end of which carrier elements at least one articulation (10) is arranged in order to fasten the flexible mats (3) in an articulated manner on the offshore construction (2).
