Abstract (en)
[origin: WO2013167745A1] The invention relates to a gateway for access to an interconnection network (ICB) of a data transmission system comprising a first local network, termed the client network, a second local network termed the cloud network and an interconnection network connecting said client network and said cloud network. According to the invention, such a gateway comprises means for identifying and routing data of said client network destined for said cloud network.
