Abstract (en)

[origin: EP2848319A1] A slurry coating device according to one embodiment of the present invention applies slurry on a running band-like body, and includes a slurry dispensing unit configured to be able to feed the slurry on the band-like body. The slurry coating device feeds the slurry on the band-like body by the slurry dispensing unit while varying the relative positional relation of the slurry dispensing unit and the band-like body in a direction substantially parallel to a face of the band-like body and substantially perpendicular to a running direction of the band-like body.
