Abstract (en)
[origin: WO2013171016A1] The invention relates to a pole grip (1), in particular for walking sticks, trekking poles, alpine ski poles, cross-country ski poles, or Nordic walking poles, and an associated hand-retaining device, or a set of said elements. The pole grip has a grip body (3) and a hook-like device (14) for fastening the hand-retaining device (25), in particular in the form of a hand loop or a glove. Movable or rotatable locking means (6) are arranged in the area of the hook-like device (14) in such a way that a loop-shaped, ring-shaped, or eye-shaped device (26) provided on the hand-retaining device (25) and inserted into the hook-like device (14) substantially from above is fastened in the hook-like device (14) in a self-locking manner. The design is characterized in particular in that means (20) that prevent rotation of a loop-shaped, ring-shaped, or eye-shaped device (26) fastened to the hook-like device (14) about the longitudinal axis (42) of the hook-like device (14) by means of form closure are provided on the hook-like device (14), and that corresponding complementary means (28) are provided on the hand-retaining device.
