Abstract (en)

[origin: WO2013170930A1] The invention relates to a hose line, in particular for diving equipment, having at least one base layer (1), and at least one open reinforcement layer (2). According to the invention, the base layer (1) is constructed of at least two sublayers (3, 3') that are seamlessly coextruded with one another, and the reinforcement layer (2) is extruded so as to be between said sublayers (3, 3').
