Abstract (en)

[origin: WO2013164341A2] The present invention is a home appliance and particularly a cooling device comprising a drawer (1) disposed into a heat insulated casing; a curved part (11) having at least one guide channel (12) and at least one air opening (14) provided on a front wall (10) of the drawer (1); a humidity regulating piece (2) regulating the humidity inside the drawer (1) by means of cool air input-output through the air opening (14) so as to close and open the air opening (14) during cool air circulation. The cooling device comprises a curved curtain (20) having at least one holder leg (21) moving inside the guide channel (12) and compliant to the curved part (11) and closing and opening the air openings (14) so as to move along a stroke distance x from a first position to a second position on the curved part (11) of the drawer (1).
