Abstract (en)  
[origin: WO2013164176A2] The invention relates to a contact arrangement for producing an electrical line connection in a cabinet (1), in particular in a refrigerator or freezer, having at least one current consumer (2), in particular a lighting unit, and a contact base (3) on a shelf (4) of the cabinet (1), wherein the contact base (3) for its part has at least one contact (5, 6) and the contact base (3) has at least one associated contact element (9, 10) which is integrated in a side wall (7, 8) of the cabinet (1) and corresponds to the contact base (3) when the shelf (4) is inserted. The invention is characterized in that the contact element (9, 10) is fitted behind a web (11), which is arranged at a physical distance from a side wall (7, 8) of the cabinet (1), such that it is protected.
