Abstract (en)
[origin: WO2013171111A1] There is described a plug-connector housing having a first housing part having electrical components, and a second housing part forming a housing cap, said second housing part being connectable to the first housing part, and having a recess in the second housing part, an electrical connecting line for the electrical attachment of electrical components of the first housing part being passable through said recess, wherein the first housing part has a sword-shaped structure which largely covers the recess after the second housing part has been connected to the first housing part. Also described is a plug connector having such a plug-connector housing.
