Abstract (en)

[origin: WO2013170846A1] The invention relates to a method and a device for transmitting sound, image and position data to a control centre (2) in the event of an emergency by means of a mobile telephone (1). Said device is equipped with a camera (3), a microphone (4), a positioning device (6) for determining position data, a control device (7) having a memory (14) and software which is stored in the memory and which controls the recording and the transmission of image data, sound data and position data. After the software is accessed, image data is automatically recorded with the camera (3) and sound data is automatically recorded with the microphone (4), the position data of the mobile telephone (1) is determined, the image data and sound data is compressed, a connection to the control centre (2) is established, and the position data, the compressed image data and sound data is transmitted to the control centre (2).
