Abstract (en)
A foldable hanging table hung on a construction structural body (10) with a leaning top surface (11) comprises a table panel (20), a suspension assembly (30) and a folding assembly (40). The suspension assembly (30) includes a support rack (31) hinged by the table panel (20) and at least one suspension arm (32) connecting to the support rack (31) and straddling the construction structural body (10) to lean on the leaning top surface (11). The folding assembly (40) includes a swivel frame (41) hinged on the table panel (20) and a driven member (42) hinged respectively on the support rack (31) and swivel frame (41). The driven member (42) includes at least one holding portion (421) to confine the swivel frame (41) from swiveling against the table panel (20) and at least one driving portion (422) connected to the holding portion (421) and operable to make the holding portion (421) separate from the swivel frame (41) so that the swivel frame (41) can swivel, thereby make folding easier and increase the support of the table panel (20).
