Abstract (en)

[origin: EP2851169A1] A band rule of die cutter comprising a base and a cutting edge is described. At the cutting edge at least one recess, or cut-out, or notch, hereinafter named 'nick', is provided, extending longitudinally for a length corresponding to the missing length of the cutting edge (14) and extending transversely through at least part of the base. The nick has a substantially drop-shaped profile as the rule is observed laterally.
