Abstract (en)

[origin: EP2851305A1] Electrical modular device with a small size, suitable for coupling to wrapping machines, which automatically performs the operations of attaching the film to start the wrapping cycle and soldering and cutting the film at the end of the wrapping cycle, comprising a mounting, a clip, a soldering and attachment group, a contrast plate group, a cutting element, a film width reducer and a controller that synchronises the action of each element.
