Abstract (en)

[origin: EP2851481A1] Heat insulation module (1) for structures subjected to compressive stresses according to the invention consists of a frame (2), within which a load-bearing latticed structure (3) is arranged, the gaps (4) between the partitions of the module being filled with a heat-insulating material (5), the load-bearing latticed structure (3) being affixed to a foundation plate (6) and covered by a topping panel (7), all the components of the module being made of a fibreglass composite material.
