Abstract (en)
The invention relates to a lock system for a door (2.1) of an oven (2) comprising a fastening element (3) mounted at the chassis of the oven (2) and a blocking element (4) with a blocking portion (4.1) pivotally mounted at the fastening element (3), wherein the blocking element (4) is adapted to be positioned in an activated tilting position (5a) in which the opening of the door (2.1) is prohibited by the blocking element (4) and a deactivated tilting position (5b) in which the opening of the door (2) is allowed by the blocking element (4), wherein at least in the activated tilting position (5a) the blocking portion (4.1) of the blocking element (4) is located with respect to the opening direction (OD) of the door (2.1) in front of the outer side of said door (2.1).
