Abstract (en)
[origin: CN104453491A] A door handle assembly (3) for a motor vehicle comprises a frame-like door handle support (6) fixed to a door (2) of the motor vehicle (1), and a manually operable handle (4) pivotally mounted at one end of the door handle support (6) and used for opening the door (2) by a user. A solution of the present invention provides a door handle which is simple in design, low in cost and saves material, and is achieved in that the door handle support (6) is used for fixing the handle (4), and a longitudinal end (7) of the handle (4) is pivotally fixed by the door handle support (6), such that the handle is positioned at a mounting position (9) in a mounting channel (8).
