Abstract (en)
[origin: WO2011141377A1] The present invention relates to a head light module (10) having at least one luminescent material (20); wherein the headlight module (10) also comprises: at least one carrier device (18) of the at least one luminescent material (20); at least one excitation radiation source (12); and at least one beam directing device (14) which is arranged in such a way that it directs radiation emitted by the at least one excitation radiation source (12) onto the at least one luminescent material (20).
