Abstract (en)  
[origin: WO2013175060A1] The invention relates to a securing link (1) for an anchor chain, cable or rope (6). The securing link (1) comprises a plurality of elongated turning elements (3, 4, 5), the first of which turning elements (3) is connected to the load (2) to be anchored and the last of which turning elements (5) is connected to the anchor chain, cable or rope (6). The turning elements (3, 4, 5) are provided with pivots (3c, 4d) or similar shafts, by means of which the turning elements (3, 4, 5) are connected at their ends as extensions of one another. The turning elements (3, 4, 5) are arranged to turn with respect to one another on pivots (3c, 4d) or similar shafts. At least one turning element (5) is provided with an elongated opening (5a), into which the pivot (4d) or similar shaft of an adjacent turning element (4) is fitted, the said pivot (4d) or similar shaft forming a rolling shaft (4d). The rolling shaft is fitted to roll along the edge (5a0 of the elongated opening (5a), the said at least one turning element (5) turning with respect to the said adjacent turning element (4).
