Abstract (en)
[origin: WO2013175320A2] The ECO ADVANTAGE MEDIATION APPARATUSES, METHODS AND SYSTEMS ("ECO ADVANTAGE") transforms user and account holder data inputs into eco and region analytics outputs. In some implementations, ECO ADVANTAGE receive a request for a user's eco balance and a account holder's current eco schedule from a account holder, receive an eco allocation confirmation indicating an allocation has been successfully processed and eco data, debit from a user's account an amount of ecos received from another account holder in a previous exchange for use in the allocation, credit to the user's account an amount of ecos based on the eco data, and store eco data in a eco record.
