Abstract (en)
The invention relates to an electric heater for an automobile vehicle, with at least one heating element and with at least one circuit board (1), whereby the circuit board (1) possesses at least one contact area (2) through which an electrical connection between a heating element and a power supply can be realized, whereas the heating element possesses at least one PTC-heating element, which is connected to at least one connecting sheet (6), whereby the heating element is bonded with a contact area (2) on the circuit board (1) through the connecting sheet (6).
