Abstract (en)

[origin: WO2013175295A1] The invention relates to a device (10) for stimulating the genital or erogenous areas of a person, including: an inflatable, deformable ball (1); at least one stimulating element (2, 3) including a first portion (2) configured so as to be able to penetrate the anus or vagina of a person sitting on said ball (1) and a second portion (3) intended for at least indirectly engaging with a supporting surface on which said ball rests (1); at least one receptacle (4) intended for at least partially containing said first portion (2), the stimulating device (10) being configured so as to move said first portion (2) gradually from a retracted position, in which most of said first portion (2) is inside the ball (1), to a projecting position in which most of said first portion (2) is outside the ball (1).
