Abstract (en)
[origin: WO2013178467A1] The invention relates to a protection element against wear, in particular a knob bolt, comprising a head part (10) from a hard material and a connecting part (20). In order to achieve a protection element against wear that has a material-optimized design, it is provided that the head part (10) is designed as an electrode in an electrically conductive manner or comprises an electrode.
