Abstract (en)  
[origin: WO2013182384A1] The invention relates to a hand-held power tool device, comprising an output unit (12a), a striker (14a), and a rotary strike receiver (16a), which is designed to establish the transfer of rotary strikes between the striker (14a) and the output unit (12a) at least during rotary striking operation. According to the invention, the hand-held power tool device has a rotary strike switch-off device (18a), which is designed to stop the transfer of rotary strikes from the striker (14a) to the rotary strike receiver (16a) at least during hammer striking operation.
