Abstract (en)

[origin: WO2013182346A1] The invention relates to a pneumatic conveyor (1) for transporting bulk materials, in particular tablets (3), having a compressor (2) for conveyor gas and having a bulk material feed (3) and a conveyor line (4), in particular hose, arranged therebetween, and a bulk material discharge (5). To prevent contamination of the environment during operation, a shut-off means (8) is provided between a collection volume (7) and the conveyor line (4). The invention further relates to a method for operating a pneumatic conveyor (1), which conveys sample volumes intermittently.
