Abstract (en)

[origin: WO2013177953A1] A system for real-time monitoring of a microfluidic reaction and a method thereof are provided. The system comprises a platform for holding a microfluidic device; a temperature control module (4); a peripheral flow module; and a real-time imaging module. The method comprises providing a reagent to the microfluidic device; and monitoring the reaction using the real-time imaging module. Furthermore, methods for optimizing a reaction condition using the system are provided.
