Abstract (en)
[origin: WO2013178319A1] The invention relates to a fitting strip for use in a textile processing machine, comprising a plurality of tooth segments (10), each of which comprises multiple teeth (13), each tooth having a tooth head (11) and a tooth base (12). The tooth segments (10) are arranged parallel to one another and are directly or indirectly connected to one another. The fitting strip is characterized in that the tooth segments (10) are connected in a bonded manner. The flat bar according to the invention is characterized in that the fitting strip (8) comprises a plurality of tooth segments (10) which can be fixed to the flat bar by means of a magnetic force.
