Abstract (en)

[origin: WO2013178530A1] A water-bearing domestic appliance (1), which is used in particular as a laundry treatment device for washing laundry, comprises a treatment container (2) and a treatment agent container (4), wherein a liquid treatment agent (7) contained in the treatment agent container (4) can be fed into the treatment container (2) at least indirectly. An introducing assembly (5) having a first water reservoir device (15) and at least one second water reservoir device (16) is provided, wherein water can be fed to the treatment container (2) by means of the first water reservoir device (15) and a first feed (17) and wherein water can be fed to at least one second introduction opening (24) of the treatment container (2) by means of the second water reservoir device (16) and a second feed (23). Furthermore, the first and second water reservoir devices (15, 16) can be filled with the treatment agent.
