Abstract (en)
[origin: WO2013174572A1] A sealing strip system (1) having a sealing strip (2) for sealing a suction zone of an evacuated roller in a machine for producing and/or processing a fibrous web is described. The sealing strip (2) has a wear volume (3) which is removed successively by tribological contact with the roller and a wear indicating device (4) which is formed by at least one hose (X) which is formed in or on the sealing strip (2) and is arranged at least partially on or in the sealing strip (2) in the region of the wear volume (3).
