Abstract (en)
[origin: WO2013174529A1] The invention proceeds from a high-performance heat-insulating panel for a composite heat-insulating system, having at least one outwardly directed surface (12a; 12b; 12d) which has an at least substantially organic high-performance insulating material (14a, 14c) with a coefficient of thermal conductivity smaller than 0.030 W/Km. It is proposed for the surface (12a; 12b; 12d) to have at least one recess (16a; 16b; 16c; 16d) provided for accommodating a fireproof material.
