Abstract (en)

[origin: WO2013173853A1] The invention relates to an arrangement (1) for moving a movable furniture part (2), in particular a furniture part which is mounted pivotably about an axis, comprising at least one ejection device (3) for ejecting the movable furniture part (2) from a closed position into an open position, the at least one ejection device (3) comprising at least one force accumulator (4), and a loading device (5) for loading the at least one force accumulator (4) by means of an opening or closing movement of the movable furniture part (2), wherein at least one Bowden cable (6) for transmitting force during the loading of the at least one force accumulator (4) is arranged between the at least one ejection device (3) and the loading device (5).
