Abstract (en)

[origin: WO2013174986A1] The invention relates to a container (1) for a tank (2) for storing a liquid additive (3), comprising a housing (4) having a heating device (5), wherein at least one apparatus (6) that can be driven is provided in order to promote convection in the housing (4). In particular, the invention further relates to a motor vehicle (11), comprising a tank (2) for storing a liquid additive (3) and an exhaust gas system (14) having an adding device (15) for the liquid additive (3), wherein such a container (1) is inserted into the tank wall (3) and a plurality of functional components (10) for conveying the liquid additive (3) from the tank (2) to the adding device (15) through the container (1) is provided therein.
