Abstract (en)

[origin: WO2013178610A1] The invention relates to a guiding means (10) for a brake lining arrangement of a disc brake, comprising a main part (12) which comprises a guiding portion (14) provided for guiding a guiding projection of the brake lining arrangement and which comprises a fixing portion (16) which is used to fix the guiding means (10) to a brake support. The fixing portion (16) has two contact surfaces (16a, 16b) and a stop surface (16c) which connects the two contact surfaces (16a, 16b). At least one elastic retaining bracket (18) is provided on the stop surface (16c), said retaining bracket being in secure engagement with the brake support (40) at least in some sections, and at least the stop surface (16c) is provided with a retaining portion (20) which can be brought into contact with the brake support (40) at least in some sections.
