Abstract (en)

[origin: WO2013178516A1] The invention relates to a household refrigeration device (1) having a storage chamber (4, 5) for refrigerated material and at least one storage container (7) arranged in the storage chamber (4, 5), the storage container having a main body (11) with at least one transparent wall section (23) and an edge cover strip (33) affixed to the main body (11). The edge cover strip (33) has a retaining device (49) on which a decor element (51) is mounted and the retaining device (49) and/or the decor element (51) is designed so as to position the decor element (51) behind a rear side (47) of the transparent wall section (23), visibly from the exterior of the main body (11) through the transparent wall section (23).
