Abstract (en)
[origin: WO2013174477A1] Electrical connection terminal (1) having a first connection device (2) which is connected to a first isolating contact (4) by means of an associated current bar (3). A second connection device (5) is connected to a second isolating contact (7) by means of an associated current bar (6). A movable isolating device (9) which is provided with a contact tap (8) is provided, it being possible to move said isolating device from a bridging position (10) to an isolating position (11).
