Abstract (en)

Mounting method of a hollow tower (11) structured in vertical sections (13) formed by concrete precast pieces (15), comprising the steps of: installing a primary module (14) of an auxiliary tower (12), coupling a deliverer platform (27) to its top and a mounting gateway (19) to its lower base; mounting those vertical sections (13) of the tower accessible from the deliverer platform (27); raising the primary module (14) in the height of a vertical section (13), adapting the surface of the mounting gateway (19) to the inner surface of the next vertical section (13) and assembling a new module (26) to the auxiliary tower (12); placing the precast pieces (15) of the next vertical section (13); joining the concrete precast pieces (15) of the next vertical section (13) with the precast pieces (15) of the lower section, and repeating steps up to complete the mounting.
